

Preparing a Print Sample of Layout for Panel Competitions

LightRoom

1. Print Panel > Select all images to be used for print panel.
2. Click on Page Setup > Window will open called Page Setup > Click on the disclosure triangle to the right of Paper Size: > Manage Custom Sizes > Click on + sign bottom left of window > Click on Untitled to rename to 6ft x 4ft > Paper Size change the values in the Width & Height box to 1829mm x 1219mm.
Make sure all the other boxes have values of 0mm > OK > OK
3. Navigate to the right side of the screen to Layout Style, click on the disclosure triangle > Custom Package > Images Settings > check box Rotate to Fit > Cells > Add to Package > Click on the disclosure triangle of any default sizes > Edit > New window called New Custom Size > Type in 22.75" x 15.25" > Click on Add. If the cell is landscape and portrait is required, click on Rotate Cell, found at the bottom of the Cells Panel >

Preparing a Print Sample of Layout for Panel Competitions

Uncheck Lock to Photo Aspect Ratio > To duplicate the cell, hold down Alt/Option on the keyboard, click inside the cell & drag at the same time. Repeat this process until the required number of cells are on the page > Re-arrange the cells to your required layout by clicking and dragging inside the cell.

4. To add images to these cells, click on an image found in the Film Strip at the bottom of the screen > Click, drag and drop image into a cell. Repeat the above until all your images are located into the cells.
5. To print an A4 print out > Click on the Grab Tool (If you can't find it. Look in Applications > Utilities > Grab) > Menu Bar > Capture > Selection > Drag over the area you want to print > Click on Untitled & rename image > Save to Desktop > Press Return Key > Navigate to Desktop > Click on Image > Cmd/P on the keyboard to bring up Print Window. (I think you know what to do here after!)
