The Autograph Midi System

The Autograph is the most versatile and cost effective solution for anyone looking to raise his or her presentation skills.

Autograph features include a gauge and rule to mark out accurately, stops and guides to make the cuts effectively, securing the mount while you work. Both straight and bevel cutters glide along the rail, supported by the [SprintMat](#) and the base and cut with minimum effort. The system is designed to allow for left or right-handed use.

With eye catching burgundy colour anodized rail and two toned base, this beautiful and yet practical system encompasses everything you need to cut your mounts. The Autograph offers you a clean, crisp and precise cut to professional standards. A user friendly product; no previous experience required!

X-Rite Colour Checker Passport
